**CONSENT ORDER
ISSUED UNDER THE
WATER POLLUTION CONTROL ACT
WEST VIRGINIA CODE, CHAPTER 22, ARTICLE 11**

TO: MarkWest Liberty Midstream & Resources, L.L.C. DATE: March 28, 2019
Gregory Bezdek, SVP, NE Region
4600 J Barry Ct. Ste 500 ORDER NO.: 8945
Canonsburg, PA 15317

INTRODUCTION

This Consent Order is issued by the Director of the Division of Water and Waste Management (hereinafter "Director"), under the authority of West Virginia Code, Chapter 22, Article 11, Section 1 et seq. to MarkWest Liberty Midstream & Resources, L.L.C. (hereinafter "MarkWest").

FINDINGS OF FACT

In support of this Order, the Director hereby finds the following:

1. MarkWest, through its contractors, is conducting land disturbance activity associated with installation of pipeline in Doddridge and Wetzel Counties, West Virginia. MarkWest was issued Water Pollution Control Permit No. WV0116815, Registration No. WVR311004, for Stormwater Associated With Oil and Gas Related Construction Activities on April 25, 2018.
2. On August 22, 2018 and August 23, 2018, West Virginia Department of Environmental Protection (WVDEP) personnel conducted an inspection of the facility. During the inspection, violations of the following sections of WV Legislative Rules and the permit were observed and documented:
 - a. Section B – MarkWest failed to comply with the approved Storm Water Pollution Prevention Plan (SWPPP). Several erosion control devices were not in place as detailed by the SWPPP. Water bars were not installed as indicated in the SWPPP in

several areas. Water bar outlet protection was not in place as indicated in the approved SWPPP in several areas.

- b. Section G.4.e.2 - MarkWest failed to properly implement controls. Specifically, there were improperly installed water bars and perimeter controls in several areas. There were several areas where a diversion berm was installed in addition to the perimeter controls indicated in the SWPPP and, in many cases, the installed diversion berm lacked adequate outlets. Several timber mat bridges were not installed as indicated in the approved SWPPP. The timber mat bridges at crossing numbers 41 (UNT Riggins Run) and 43 (Riggins Run) were not properly tied into the installed perimeter controls. The approved SWPPP indicates the need for stabilized access roads; however, unstable access roads were noted in the Phoenix Construction work areas.
- c. Section G.4.c - MarkWest failed to modify its SWPPP when the SWPPP proved to be ineffective in achieving the general objectives of controlling pollutants in storm water discharges. There were several areas where sediment laden water could leave the site, but the SWPPP did not indicate the need for a Best Management Practice (BMP). There were also areas where the installed BMPs proved to be inadequate, and MarkWest had not modified the SWPPP.
- d. Section G.4.e.2.A.ii.f - MarkWest failed to protect fill slopes. Concentrated flow was being directed over fill slopes due to improperly constructed water bars, as well as water bars that were in need of maintenance.
- e. Section G.4.e.2.A.ii.j - MarkWest failed to prevent sediment-laden water from leaving the site without going through an appropriate device. Offsite sediment deposits occurred in several areas. The sediment laden water left the site due to improperly installed BMPs, failure to modify the SWPPP, inadequate dewatering BMPs, and BMPs that were not in place.
- f. Section D.1 - MarkWest failed to operate and maintain all erosion control devices. Improperly maintained BMPs were noted throughout the inspected area.
- g. 47CSR2 Section 3.2.a – MarkWest caused conditions not allowable in waters of the State by creating distinctly visible settleable solids in the following four (4) locations: the unnamed tributary (UNT) of Beverlin Fork (UNT 129) (39° 26.346' X 80° 36.157'), the UNT of Franks Run (39° 26.230' X 80° 36.769'), and the UNT of Franks Run (39° 26.167' X 80° 36.861').
- h. 47CSR2 Section 3.2.b – MarkWest caused conditions not allowable in waters of the State by creating sediment deposits in the following ten (10) locations: the UNT of Morgans Run (UNT 160) (39° 18.488' X 80° 40.335'), the UNT of Flint Run (UNT 94 near 272+00) (39° 20.051' X 80° 39.945'), the UNT of Beverlin Fork (UNT 129) (39° 26.346' X 80° 36.157'), the UNT of Franks Run (Adjacent to 798+60) (39° 26.011' X 80° 36.969'), the UNT of Morgans Run (39° 17.638' X 80° 40.727'), the UNT of Righthand Fork of Morgans Run (UNT 108) (39° 17.955' X 80° 40.580'), the UNT of Franks Run (39° 26.230' X 80° 36.769'), the UNT of Franks Run (39° 26.167' X 80° 36.861'), the UNT of Beverlin Fork (39° 26.280' X 80° 36.183'), and the UNT of Franks Run (39° 25.885' X 80° 37.133').

As a result of the aforementioned violations, Notice of Violation (NOV) No. W18-09-085-TJC was issued to MarkWest.

- 3. On September 7, 2018, WVDEP issued Order No. 8879 to MarkWest in response to the aforementioned violations. The Order required MarkWest to submit an approvable plan

of corrective action and schedule, outlining action items and completion dates for how and when MarkWest would achieve compliance with all terms and conditions of its permit and pertinent laws and rules. On October 19, 2018, MarkWest's plan of corrective action was approved and incorporated into the terms and conditions of Order No. 8879.

4. On September 21, 2018, WVDEP personnel conducted an inspection of the facility. During the inspection, violations of the following sections of the terms and conditions of the WV/NPDES permit were observed and documented:
 - a. Section D.1. - MarkWest failed to properly operate and maintain all systems of treatment and control.- Specifically, MarkWest failed to maintain perimeter controls near the Route 20 bore site and Arches Fork Road.
 - b. Section G.4.e.2.A.ii.j - MarkWest failed to prevent sediment-laden water from leaving the site without going through an appropriate device near Arches Fork access road.
- As a result of the aforementioned violations, NOV No. W18-52-032-RDD was issued to MarkWest.
5. On October 10, 2018 and October 11, 2018, WVDEP personnel conducted an inspection of the facility. During the inspection, violations of the following sections of Legislative Rule and the permit were observed and documented:
 - a. Section D.1 - MarkWest failed to operate and maintain all erosion control devices. Maintenance of installed BMPs was lacking throughout the inspected area on perimeter controls, access road stabilization, water bars, and water bar terminus BMPs.
 - b. Section G.4.c - MarkWest failed to modify its SWPPP when it proved to be ineffective in achieving the general objectives of controlling pollutants in storm water discharges. The installed diversion berm had inadequate outlets, and the plan had not been modified in many areas since the previous inspection. The SWPPP did not indicate the need for a BMP in the areas adjacent to 142+00, 415+00, and 435+00 to prevent sediment laden water from leaving the site.
 - c. Section G.4.e.2 - MarkWest failed to properly implement controls. Specifically, improperly installed water bars, water bar terminus BMPs, perimeter controls, timber mat bridges, and timber mat bridge tie-ins were noted in several areas.
 - d. Section B - MarkWest failed to comply with the approved SWPPP. Water bar terminus BMPs were not installed as indicated in the SWPPP adjacent to 510+00 and from 561+00 to 588+00. Perimeter controls that were indicated in the approved SWPPP were not installed as indicated from 561+00 to 588+00. Access road 42 was not stabilized with gravel as indicated in the SWPPP.
 - e. Section G.4.e.2.A.ii.f - MarkWest failed to protect fill slopes. Concentrated flow was being directed over unprotected fill slopes in several areas.
 - f. Section G.4.e.2.A.i - MarkWest failed to provide interim stabilization on areas where construction activities have temporarily ceased for more than twenty-one (21) days. Areas adjacent to 287+00 (Stockpile), 350+80 (Stockpile), and 862+00 (entire Right Of Way) were idle since the previous inspection and lacked temporary stabilization.

A representative of MarkWest stated that the area had been idle for more than one (1) month.

- g. Section G.4.e.2.A.ii.j - MarkWest failed to prevent sediment-laden water from leaving the site without going through an appropriate device. Offsite sediment deposits in several areas occurred due to improper operation and maintenance, improperly installed BMPs, failure to install BMPs indicated in the approved SWPPP, failure to modify the SWPPP when it proved to be inadequate and/or ineffective, and failure to protect fill slopes from erosion.
- h. 47CSR2 Section 3.2.a.- MarkWest caused conditions not allowable in waters of the State by creating distinctly visible settleable solids in the following seven (7) locations: the UNT of Franks Run (39°25.922' X 80°37.079'), the UNT of Beverlin Fork (UNT 21) (39°26.296' X 80°36.165'), the UNT of Franks Run (UNT127) (39°26.234' X 80°36.756'), the UNT of Beverlin Fork (39°26.320' X 80°36.101'), McElroy Creek (39°23.952' X 80°38.768'), the UNT of Riggins Run (UNT – 18) (39°22.075' X 80°39.463'), and the UNT of Riggins Run (39°21.443' X 80°39.489').
- i. 47CSR2 Section 3.2.b. – MarkWest caused conditions not allowable in waters of the State by creating sediment deposits in the following twelve (12) locations: the UNT of Buckeye Creek (UNT59) (39°16.844' X 80°41.115'), the UNT of Morgans Run (39°17.640' X 80°40.738'), the UNT of Righthand Fork of Morgans Run (UNT 2) (39°17.932' X 80°40.600'), the UNT of Flint Run (39°21.161' X 80°39.549'), the UNT of Flint Run (39°21.223' X 80°39.649'), the UNT of Franks Run (39°25.922' X 80°37.079'), the UNT of Beverlin Fork (UNT 21) (39°26.296' X 80°36.165'), the UNT of Morgans Run (39°17.506' X 80°40.813'), the UNT of Flint Run (39°20.058' X 80°39.931'), the UNT of Morgans Run (39°18.509' X 80°40.356'), the UNT of Riggins Run (UNT – 18) (39°22.075' X 80°39.463'), and the UNT of Riggins Run (39°21.443' X 80°39.489').

As a result of the aforementioned violations, NOV No. W18-09-098-TJC was issued to MarkWest.

- 6. On November 2, 2018, WVDEP issued Order No. 8904 to MarkWest in response to the aforementioned violations. The Order required MarkWest to submit an approvable plan of corrective action and schedule, outlining action items and completion dates for how and when MarkWest would achieve compliance with all terms and conditions of its permit and pertinent laws and rules. On December 4, 2018, MarkWest's plan of corrective action was approved and incorporated into the terms and conditions of Order No. 8904.
- 7. On November 29, 2018, WVDEP personnel conducted an inspection of the facility. During the inspection, violations of the following sections of Legislative Rule and the permit were observed and documented:
 - a. Section B - MarkWest failed to comply with the approved SWPPP. Water bars were not in place as detailed by the approved SWPPP from 661+00 to 682+00.
 - b. Section G.4.e.2.- MarkWest failed to properly implement controls. Water bar outlets that did not extend past the installed perimeter controls as indicated in the approved SWPPP were noted from 812+00 to 889+00. This caused concentrated flow to follow the installed silt fence trench instead of discharging offsite in small quantities as designed.

- c. Section D.1. – MarkWest failed to operate and maintain all erosion control devices. The installed filter sock at a water bar terminus near 861+00 was not properly operated, which allowed sediment laden water to bypass the device.
- d. Section G.4.e.2.A.ii.j – MarkWest failed to prevent sediment-laden water from leaving the site without going through an appropriate device. Offsite sediment laden water that originated from the site was noted near 861+00 due to a bypass of a water bar terminus BMP.

As a result of the aforementioned violations, NOV No. W18-09-111-TJC was issued to MarkWest.

- 8. On February 19, 2019, WVDEP personnel and representatives of MarkWest met to discuss the terms and conditions of this Order.
- 9. On February 27, 2019, WVDEP personnel conducted an inspection of the facility. During the inspection, violations of the following sections of Legislative Rule and the permit were observed and documented:
 - a. Section B - MarkWest failed to comply with the approved SWPPP. Two (2) geotextile bags were being utilized in an area adjacent to 367+50 that was not well vegetated, and a geotextile lined flow path was not provided as indicated in the approved SWPPP. As a result, downstream erosion gullies had formed.
 - b. Section G.4.c - MarkWest failed to modify its SWPPP when the geotextile filter bag proved to be ineffective in achieving the general objectives of controlling pollutants in storm water discharges.
 - c. Section G.4.e.2.A.ii.j – MarkWest failed to prevent sediment-laden water from leaving the site without going through an appropriate device. Sediment-laden water left the site as a result of the aforementioned ineffective geotextile filter bag.
 - d. 47CSR2 Section 3.2.a. - MarkWest caused conditions not allowable in waters of the State by creating distinctly visible settleable solids in Boggs Run (UNT 95) (39°21.161' X 80°39.549').

As a result of the aforementioned violations, NOV No. W19-09-017-TJC was issued to MarkWest.

ORDER FOR COMPLIANCE

Now, therefore, in accordance with Chapter 22, Article 11, Section 1 et seq. of the West Virginia Code, it is hereby agreed between the parties, and ORDERED by the Director:

- 1. MarkWest shall immediately take all measures to initiate compliance with all terms and conditions of its WV/NPDES permit and pertinent laws and rules.
- 2. Within twenty (20) days of the effective date of this Order, MarkWest shall submit for approval a proposal which includes provisions for proper remediation of all areas identified in this Order where conditions not allowable were observed and documented in waters of the State, as defined in WV Legislative Rule 47CSR2 Section 3.2. In addition,

the proposal shall include, but not be limited to, provisions for submittal of a report which documents that proper remediation of the aforementioned areas has occurred. The proposal shall make reference to Permit No. WV0116815, Registration No. WVR311004, and Order No. 8945 and shall be submitted to:

**Chief Inspector
Environmental Enforcement - Mail Code #031328
WVDEP
601 57th Street SE
Charleston, WV 25304**

Upon approval, the proposal shall be incorporated into and become part of this Order, as if fully set forth herein. Failure to submit an approvable proposal or failure to adhere to the proposal is a violation of this Order.

3. Because of MarkWest's West Virginia Code, Legislative Rule and permit violations, MarkWest shall be assessed a civil administrative penalty of one hundred twenty-four thousand thirty dollars (\$124,030) to be paid to the West Virginia Department of Environmental Protection for deposit in the Water Quality Management Fund within thirty (30) days of the effective date of this Order. Payments made pursuant to this paragraph are not tax-deductible for purposes of State or federal law. **Payment shall include a reference to the Order No. and shall be mailed to:**

**Chief Inspector
Environmental Enforcement - Mail Code #031328
WV-DEP
601 57th Street SE
Charleston, WV 25304**

OTHER PROVISIONS

1. MarkWest hereby waives its right to appeal this Order under the provisions of Chapter 22, Article 11, Section 21 of the Code of West Virginia. Under this Order, MarkWest agrees to take all actions required by the terms and conditions of this Order and consents to and will not contest the Director's jurisdiction regarding this Order. However, MarkWest does not admit to any factual and legal determinations made by the Director and reserves all rights and defenses available regarding liability or responsibility in any proceedings regarding MarkWest other than proceedings, administrative or civil, to enforce this Order.
2. The Director reserves the right to take further action if compliance with the terms and conditions of this Order does not adequately address the violations noted herein and reserves all rights and defenses which he may have pursuant to any legal authority, as well as the right to raise, as a basis for supporting such legal authority or defenses, facts other than those contained in the Findings of Fact.
3. If any event occurs which causes delay in the achievement of the requirements of this Order, MarkWest shall have the burden of proving that the delay was caused by

circumstances beyond its reasonable control which could not have been overcome by due diligence (i.e., force majeure). Force majeure shall not include delays caused or contributed to by the lack of sufficient funding. Within three (3) working days after MarkWest becomes aware of such a delay, notification shall be provided to the Director/Chief Inspector and MarkWest shall, within ten (10) working days of initial notification, submit a detailed written explanation of the anticipated length and cause of the delay, the measures taken and/or to be taken to prevent or minimize the delay, and a timetable by which MarkWest intends to implement these measures. If the Director agrees that the delay has been or will be caused by circumstances beyond the reasonable control of MarkWest (i.e., force majeure), the time for performance hereunder shall be extended for a period of time equal to the delay resulting from such circumstances. A force majeure amendment granted by the Director shall be considered a binding extension of this Order and of the requirements herein. The determination of the Director shall be final and not subject to appeal.

4. Compliance with the terms and conditions of this Order shall not in any way be construed as relieving MarkWest of the obligation to comply with any applicable law, permit, other order, or any other requirement otherwise applicable. Violations of the terms and conditions of this Order may subject MarkWest to additional penalties and injunctive relief in accordance with the applicable law.
5. The provisions of this Order are severable and should a court or board of competent jurisdiction declare any provisions to be invalid or unenforceable, all other provisions shall remain in full force and effect.
6. This Order is binding on MarkWest, its successors and assigns.
7. This Order shall terminate upon MarkWest's notification of full compliance with the "Order for Compliance" and verification of this notification by WVDEP.

Installed bridge at crossing # 48 that lacks the top layer of timber mats as indicated in the approved SWPPP.

Evidence of sediment laden water bypass under the above pictured bridge (Crossing # 48).

MARKWEST LIBERTY MIDSTREAM & RESOURCES, L.L.C., WVR311004, Sherwood to Mobley 20" NGL, 10/10 &
10/11/2018

Installed bridge at crossing # 54 that lacks the top layer of timber mats as indicated in the approved SWPPP and is in need of maintenance. Bridge allowed sediment laden water to bypass the device and caused CNA distinctly visible settleable solids in McElroy Creek (39°23.952' X 80°38.768').

Above pictured bridge showing sediment laden water bypass.

MARKWEST LIBERTY MIDSTREAM & RESOURCES, L.L.C., WVR311004, Sherwood to Mobley 20" NGL, 10/10 & 10/11/2018

CNA distinctly visible settleable solids in McElroy Creek (39°23.952' X 80°38.768').

CNA distinctly visible settleable solids in McElroy Creek (39°23.952' X 80°38.768') as a result of the bridge at crossing # 54.

MARKWEST LIBERTY MIDSTREAM & RESOURCES, L.L.C., WVR311004, Sherwood to Mobley 20" NGL, 10/10 & 10/11/2018

Area adjacent to 142+00 where BMPs are not indicated in the approved SWPPP and the SWPPP needs to be modified in order to prevent sediment laden water from leaving the site.

Area adjacent to 142+00 where BMPs are not indicated in the approved SWPPP and the SWPPP needs to be modified in order to prevent sediment laden water from leaving the site.

MARKWEST LIBERTY MIDSTREAM & RESOURCES, L.L.C., WVR311004, Sherwood to Mobley 20" NGL, 10/10 & 10/11/2018

Area adjacent to 415+00 where BMPs are not indicated in the approved SWPPP and the SWPPP needs to be modified in order to prevent sediment laden water from leaving the site.

Offsite sediment deposits adjacent to 415+00.

MARKWEST LIBERTY MIDSTREAM & RESOURCES, L.L.C., WVR311004, Sherwood to Mobley 20" NGL, 10/10 & 10/11/2018

Area adjacent to UNT Riggins Run where the approved SWPPP does not indicate the need for a BMP and sediment laden water is leaving the site with no device in place and causing CNA in the stream.

Area adjacent to UNT Riggins Run where the approved SWPPP does not indicate the need for a BMP and sediment laden water is leaving the site with no device in place and causing CNA in the stream.

Responsible Party: Mark West Liberty Midstream & Resources, L.L.C. Receiving Stream: _____

Treatment System Design Maximum Flow: _____ MGD

Treatment System Actual Average Flow: _____ MGD (if known)

Enter FOF# and rate each finding as to Potential and Extent.

1)	Potential for Harm Factor	Factor Range	FOF#												
			2a	2b, 2f	2c	2d	2h	5a, 5c	5b	5d	5e	5f	5h	5i	7a
a)	Amount of Pollutant Released	1 to 3	1	1	1	1	1	1	1	1	1	1	1	1	1
b)	Toxicity of Pollutant	0 to 3	1	1	0	1	1	1	0	1	1	1	1	1	1
c)	Sensitivity of the Environment	0 to 3	1	1	0	1	1	1	0	1	1	1	1	1	1
d)	Length of Time	1 to 3	1	1	1	1	1	2	2	2	2	1	1	1	3
e)	Actual Exposure and Effects thereon	0 to 3	1	1	0	1	1	1	0	1	1	1	1	1	1
	Average Potential for Harm Factor		1	1	0.4	1	1	1.2	0.6	1.2	1.2	1	1	1	1.4
2)	Extent of Deviation Factor	Factor Range													
	Degree of Non-Compliance	1 to 3	3	3	3	3	3	3	3	3	3	3	3	3	3

Potential for Harm Factors:

- 1)c - Sensitivity of the Environment Potentially Affected (0 for "dead" stream)
- 1)d - Length of Time of Violation
- 1)e - Actual Human/Environmental Exposure and Resulting Effects thereon

Examples/Guidance:

Note: Rate as 1 for Minor, 2 for Moderate and 3 for Major. Rate as 0 if it does not apply.

Minor = exceedance of permit limit by <=40% for Avg. Monthly or <=100% for Daily Max., exceed numeric WQ standard by <= 100%, or report doesn't contain some minor information.

Moderate = exceedance of permit limit by >= 41% and <= 300% for Avg. Monthly , >= 101% and <= 600% for Daily Max., exceed numeric WQ standard by >= 101% and <= of 600% or report doesn't fully address intended subject matter.

Major = exceedance of permit limit by >= 301% for Avg. Monthly, >= 601% for Daily Max., exceed numeric WQ standard by >= 601%, failure to submit a report, failure to obtain a permit, failure to report a spill, etc. Note that a facility in SNC should be rated as major for length of time and degree of non-compliance.

Narrative WQ standard violations - case-by-case.

Continue rating **Findings of Facts (FOF)** here, if necessary. Otherwise, continue on Page 3.

Penalty Adjustment Factors

(pursuant to 47CSR1-6.2)

Penalty Adjustment Factor

6.2.b.1 - Degree of or absence of willfulness and/or negligence - 0% to 30% increase
 6.2.b.4 - Previous compliance/noncompliance history - 0% to 100% increase - based upon review of last three (3) years - Warning = maximum of 5% each, N.O.V. = maximum of 10% each, previous Order = maximum of 25% each - Consistent DMR violations for <1 year = 10% maximum, for >1 year but <2 years = 20% maximum, for >2 years but <3 years = 30% maximum, for >3 years = 40 % maximum

6.2.b.6 - Economic benefits derived by the responsible party (increase to be determined)

6.2.b.7 - Public Interest (increase to be determined)

6.2.b.8 - Loss of enjoyment of the environment (increase to be determined)

6.2.b.9 - Staff investigative costs (increase to be determined)

6.2.b.10 - Other factors

Size of Violator: 0 - 50% decrease

NOTE: This factor is not available to discharges that are causing a water quality violation. This factor does not apply to a commercial or industrial facility that employees or is part of a corporation that employees more than 100 individuals.

Avg. Daily WW Discharge Flow (gpd)	% Reduction Factor
< 5,000	50
5,000 to 9,999	40
10,000 to 19,999	30
20,000 to 29,999	20
30,000 to 39,999	10
40,000 to 99,999	5
> 100,000	0

Additional Other factors to be determined for increases or decreases on a case-by-case basis.

Public Notice Costs (cost for newspaper advertisement)

6.2.b.2 - Good Faith - 10% decrease to 10% increase

6.2.b.3 - Cooperation with the Secretary - 0% to 10% decrease

6.2.b.5 - Ability to pay a civil penalty - 0% to 100% decrease

Base Penalty Adjustments

(pursuant to 47CSR1-6.2)

Penalty Adjustment Factor	% Increase	% Decrease	Base Penalty Adjustments
6.2.b.1 - Willfulness and/or negligence -	10		\$9,920
6.2.b.4 - Compliance/noncompliance history	25		\$24,800
6.2.b.6 - Economic benefits - (flat monetary increase)			\$0
6.2.b.7 - Public Interest - (flat monetary increase)			\$0
6.2.b.8 - Loss of enjoyment - (flat monetary increase)			\$0
6.2.b.9 - Investigative costs - (flat monetary increase)			\$0
6.2.b.10 - Other factors (size of violator)			\$0
6.2.b.10 - Additional Other Factors - Increase (flat monetary increase)			\$0
6.2.b.10 - Additional Other Factors - Decrease (flat monetary decrease)			\$0
Public Notice Costs (flat monetary increase)	\$30		\$30
6.2.b.2 - Good Faith - Increase			\$0
6.2.b.2 - Good Faith - Decrease			\$0
